

A. DENİZ ÖZKAN

Introduction

Hello, I'm Deniz; a tech enthusiast with a passion for web development. Started in early 2000s during php and jquery era. Currently, I am dedicated to mastering TypeScript, React, and Next.js, while also exploring various backend and database solutions. I'm committed to keep current with the latest industry trends.

Latest Projects

Donis.Dev (2023)

Next.js 14, Tailwind, MDX, SSG

My personal developer portfolio using Next.js app router and static exports. Using MDX markdown files as a content management system. Hosted on GH Pages.

Feely-Message (2023)

Next.js 13, Tailwind, Firebase

A social web app for special occasion messages like birthdays etc. Using firebase for auth and database. This was a learning project for Next app router and caching.

Costotus.com (2022)

React18, Tailwind, Daisy UI

A manufacturing cost tracking and analysis tool for small businesses. One of my first projects with react. All data is stored in local storage and state is managed using Context API.

Unikim.com (2017)

PHP, MySQL, JQuery, Bootstrap

A catalogue site for the company I'm working for along with an admin site to manage content. Whole project is custom coded with no frameworks or CMS solutions.

Other Projects (2008-2024)

Please visit [Donis.Dev](#) for many more of my projects and their details.

Skills

Web Technologies: Javascript, Typescript, React, Next.JS, Tailwind, css, html5, php, etc...
